

Best Practices

01 - Women Empowerment:

“Women belong in all places above decision are being made. It should be that women are the exception” – **Ruth Bader Ginsburg.**

Objectives :

1. To make women independent
2. To provide the Education on Empowerment of women
3. To make their importance in society and increase their participation

The Practice : We believe that neatly educated and empowerment of women & skills are agents of Social changes. When women and girls are supported, they gain opportunities to speak up their right and also to advocate for their communities. They are also able to rise in social standing and they can feed into future generation. College Education Emphasis on Women Empowerment Education awareness program to enhance the ability to reach their full potential

Obstacles Faced : Students from rural area hesitated in participation for the several program. We have taken proper decision to make girls students so much aware about the women empowerment by increased their participation in activities and focused on co-operation and productive activities, so that problem can be eliminated.

Impact of the practice the amazing facts seen.

1. Female students are now more confident.
2. All students understood the importance of women empowerment.

Resource Required : This practice require committed faculty members and students to work as a team.

02- Waste Management :

Waste Management in all those activities and action required to manage waste from its inception to its final disposal.

The objectives :

1. To consider waste collection strategies.
2. To recycling
3. To minimize waste production.

The practice : Institute Encourages Environment friendly practice as given below :-

- Solid waste management
- Liquid waste management
- Biomedical waste management
- E-waste management

To create waste management at Institute, Students and Faculty and non-teaching staffs are educated on proper waste management practices through lectures, efforts have taken reduce the waste from the campus and emphasis on clean and green campus.

Obstacles : In the beginning of the program we realized that how to dispose the waste generated in the campus. To overcome these challenges we made waste collection strategies and determine the location for waste management sites.

Impact of the Practice : The Impact of the practice is outstanding

1. It helped in making campus waste free
2. Students understood the importance of the disposal of the waste.
3. It makes the students to work in team.
4. It helps out to learn new strategies to tackle with waste.

Resources Required : This practice requires teaching and non-teaching staffs and students.
